MADE IN ITALY

WHAT IS THE MOST DIFFICULT IMPERFECTION TO DEAL WITH IN THE INSTITUTE? DEFINITELY THE TONING UP OF THE TISSUES.

Over the years, inevitably, the musculature and consequently the overlying skin lose tone and take on an unaesthetic flabbiness, which affects the whole body and trunk, arms, and thighs, in particular.

The only really effective way to counteract this annoying phenomenon would be muscle exercise, but it is tiring for most people and, above all, demanding in terms of time: in fact, it is not easy to find a couple of hours 3-4 times a week with all family and work commitments.

We all know how good physical activity is to regain energy, tone, and especially keep in shape, but also how difficult it is to turn your good intentions into actions with determination!

Today the solution is easy:

thanks to the ToneUp31 platform, even the laziest and busiest people can have a sculpted body.

ToneUp 31- Slim is a **DIFFUSED ELECTRONIC STIMULATION (DES)**: system which can be used to complete the FIT function, by alternating the sessions during the week, or it can be used alone to treat imperfections such as cellulite and loss of skin elasticity. ToneUp Slim is a pleasant and relaxing treatment that provides clear and visible results in 40 minutes only, right after the first session, thanks to the strong drainage of the liquids contained in the interstices of the areas affected by cellulite.

It forces the muscles with mild but continuous vibrations that favour lymphatic drainage, resulting in increased elimination of the interstitial fluids that are the first stage of cellulite. The ToneUp 31 Slim treatment can be total or regional for legs, arms or abdomen, and is enhanced by the use of 31 herbs of the cosmetic T-Shock 31 Gel whose active ingredients, penetrating deep thanks to diffused electronic stimulation, make the most of the power of the 6 contemporary actions:

Draining Action: able to remove liquids loaded with toxins of the areas with cellulite.

Detoxifying Action: able to neutralize the various toxins and promote their elimination through the skin.

Lipolytic Action: able to activate lipases, enzymes that favour the removal of fat from fat cells.

Thermogenic Action: (also known as diaphoretic action) there are plants that can increase the local heat, an endogenous heat very similar to what is obtained by the use of radio frequency.

Antioxidant Action: it counteracts the formation of free radicals in the tissues.

Toning Action: able to increase the tissue's elasticity
